BUSINESS SOLUTIONS UNLIMITED, INC.

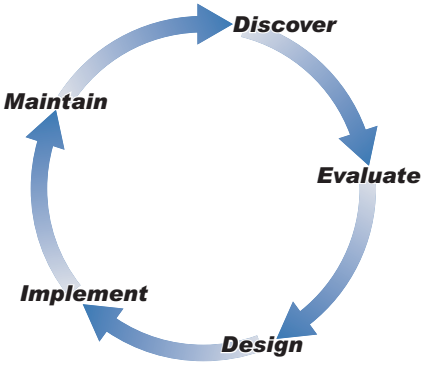
Business Continuity & Disaster Prevention Services for Financial Planners, Advisors and Broker Dealers

Financial services providers at all levels are facing increased regulatory compliance requirements. As a financial advisor you are subject to specific requirements intended to assure the security and reliability of your customer's confidential financial and other personal data. Regardless of the size of your operation, you have an obligation to your clients to protect their information and to ensure secure communication of that information at all times.

The security and reliability of your own computer network is at the start of any effort! Even if all your clients' data is located at your broker/dealer, there's a significant amount of client correspondence and other information that passes through your computer network. If it doesn't run smoothly, if it's subject to virus or spam attacks, if the power goes out, or any of a number of things that can cause a disruption–you and your clients will suffer! Think about what would happen if you walked into work one morning and your network were simply unavailable? How would you conduct your business?

Business Continuity, Reliability and Security with Business Solutions Unlimited, Inc.

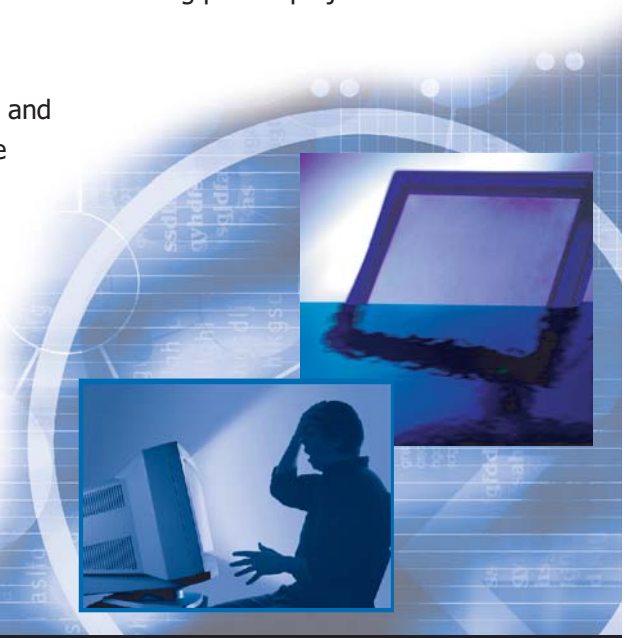
Business Solutions Unlimited provides a range of innovative services to help you manage risks to your Information Technology investment. Solutions are based on a proven proactive approach to IT Management and are custom-designed for each client.



BSU is a technology services firm dedicated to pro-active management of your IT infrastructure, assuring compliance with regulatory requirements. BSU helps to **discover** the risks you face and what needs to be done to improve your level of compliance, security and reliability.

We **evaluate** alternatives to deal with risks and take advantage of opportunities. We **design** custom solutions that focus on your business objectives rather than the technology, and we **implement** those solutions using proven project management approaches.

Above all, BSU doesn't leave you on your own to manage your computers and network or run your web site or software application. We have a complete program of services to help monitor and **maintain** your information technology assets from both compliance and performance perspectives, which allows us to **discover** the next risk before it has a chance to affect your operation. And, in the event of a critical disruption to your business, BSU is prepared–and has prepared you as our client–to fully recover in the shortest time possible.



Find out how BSU can help you manage your IT risk and assure your business remains compliant, secure, reliable and recoverable. Call Business Solutions Unlimited, Inc. at 847-559-0992 or email us at info@bsu-usa.com.
